Comment - Comments on factual errors and suggestions to improve the usefulness of this open source website is welcome. Please email your comments to [dchang@usouthal.edu](mailto:dchang@usouthal.edu)

Contribution - If you (RT educators and practitioners) find this website useful and would like to make a positive impact to your colleagues and students across the U.S., feel free to send your contributions as an attachment of an email to [dchang@usouthal.edu](mailto:dchang@usouthal.edu)

Contributions are subject to edit for clarity and become the open source materials of RTexam.com. Contributions should follow three basic guidelines:

- (1) current respiratory care practice (clinical data, equipment, and therapeutic procedures);
- (2) multiple-choice format with four answers;
- (3) explanations for the correct and incorrect answers.

If you do not have the time to write the explanations (#3 above), you may send the file (e.g., final course exam, exit exam) as an attachment to [dchang@usouthal.edu](mailto:dchang@usouthal.edu). Questions in these files will be sorted and posted on RTexam.com.

Thank you for your comments or contributions. I sincerely look forward to hearing from you by email [dchang@usouthal.edu](mailto:dchang@usouthal.edu) (with subject line rtxam.com) or phone 251-445-9289.

David W. Chang, Professor  
Department of Cardiorespiratory Care  
University of South Alabama  
HAHN 3137  
307 N. University Ave  
Mobile, AL 36688-0002
